

Automation Test Evidence

Execution Summary

Objective: This document serves as the official test execution evidence for the end-to-end regression suite of the SauceLabs E-Commerce platform, validating core functional workflows, user authentication matrices, navigation funnel paths, dynamic financial pricing calculations, and visual typography styling tokens.

Framework: Java, JUnit 5, Playwright, Maven

Test Execution: Performed locally on Chromium

Execution Date: 15.08.2026

Results: Total Tests 89 – Passed 89 – Errors 0 – Skipped 0
